kim demuth

9 sept- 2 oct 2010

Kim Demuth's *Camino* is the inaugural exhibition at Beam Contemporary. With *Camino*, Demuth presents a series of unique photographic objects inspired by his journey across Spain on the El Camino de Santiago pilgrimage. Using photographs taken during this 900km walk as his raw material, Demuth then combines, alters and transforms these photographic fragments. The resulting image-objects are no longer simply documents of the walk, but instead create an almost dream-like space that lies somewhere between fiction and reality. These visions beckon the viewer to enter their constructed world.
